Mesquite Maintenance Technician

Description

Coordinates processes and activities related to vehicle maintenance and equipment utilized in support of transit operations.

Responsibilities

A bus maintenance technician is an experienced mechanic who is responsible for repairing buses. Work is based on a workorder or schedule performing repair and preventative maintenance on buses. Typical duties and responsibilities include:

- Perform scheduled preventative maintenance for any buses they are assigned.
- Performing mechanical repairs on buses to include major overhauls if directed.
- Making emergency service calls for stranded buses.
- Alert parts technician, if necessary, stock is needed.
- Ensuring that the shop/working area in a clean, orderly, and safe condition
- Maintaining, repairing, and inspecting the bus tires and rims
- Replacing and adjusting brakes, belts, and hoses
- Performing complete safety inspections on buses, as required
- Estimating the time, material, and equipment needed for assigned jobs if required.
- Assisting with minor bus body repairs

Qualifications

Bus mechanics will need to have completed high school classes in automotive repair, electronics, computers and possibly mathematics. It is recommended to complete a vocational or other postsecondary education program in automotive service technology.

Mechanics must have at least 2 years of experience (or relevant schooling and 1 year of experience). Certifications are not required but mechanics should have knowledge in nine different automobile specialty areas: automatic transmission/transaxle, brakes, light vehicle diesel engines, electrical/electronic systems, engine performance, engine repair, heating and air-conditioning, manual drive train and axles, and suspension and steering.

Skills

- Physical fitness and stamina, as bus mechanics will need to stand up for long periods of time, lift heavy materials and potentially work in small and cramped spaces.
- Organizational skills, as they will need to manage the schedule of when each bus is to undergo maintenance.
- Attention to detail, as spotting issues and restoring damage requires someone who can notice even the smallest imperfections.
- Time management skills, as bus mechanics will need to ensure that repairs
